Topic: Lakeland Company's Raising Funds to Help Haiti

Lakeland based electronics and inkjet cartridge recycling company AVB Recycle in conjunction with its recycling customers are collecting small electronics such as cell phones, MP3's, GPS, Laptops, and Inkjet Cartridges that will raise funds to help the children and families of Haiti. 100% of the net proceeds will be distributed to reputable organizations such as the Red Cross International Response Fund and local Haitian missions.

Desiree Huber, President of AVB Recycle says said companies in Lakeland and all around Polk County are signing up to participate. "We started the program for Haiti to generate funds to help the victims of this tragedy, and it's amazing how many organizations are signing up to participate and how many of our current recycling customers have decided to defer their returns from recycling to this worthy cause. Most households have a number of unused electronics sitting in drawers or collecting dust. Instead throwing them out and having them end up in our landfill you can simply drop them off at one of our drop locations or mail them directly to us." For a list of drop-off locations or more information on how you can donate your unused electronics or inkjet cartridges visit www.avbrecycle.com.

About AVB Recycle

Founded in 2008 *AVB Recycle, LLC* a family owned Lakeland FL based electronics and inkjet cartridge recycling company was established to create financially and environmentally positive relationships with charities and companies to ensure that the benefits of electronics are maximized. *AVB Recycle* recycles all donated electronics and Inkjet cartridges in an environmentally responsible manner through our relationship with recycling partners selected for their processes which are approved by the EPA and WEEE (Waste Electrical and Electronic Equipment). Electronics which can be reused or refurbished are sold and the revenues from these devices allow us to compensate our customers for the devices collected and offset costs including the destruction of un-useable devices.
